

Integrated management for sustainable forage-based livestock systems in the tropics

An educational manual on
key principles for grazing land management
and livestock production

Compiled by

- Centre for Integrated Resource Management

in partnership with

- Queensland Department of Primary Industries
- Queensland Department of Lands
- The University of Queensland
- CSIRO

Tropical Grassland Society of Australia – Occasional Publication No. 6

Contents

Chapter 1

The forage and livestock system: overview and concepts

Livestock industry issues	1
An integrated approach	1
What is a system?	1
The forage-based livestock system	4
Integrated management	5
References	5

Chapter 2

The forage base: climate, soils and pastures

Principles	7
Climate and plant growth	7
Rainfall variability and SOI	13
Soil fertility and plant growth	15
Modelling native pasture growth	18
Grassland community attributes	19
Soil erosion and salinity	23
Putting it all together	24
References	25

Chapter 3

Animal nutrition: production and reproduction

Principles	27
A process approach to production from animals at pasture	28
Feed intake	29
Animal production and production efficiency	33
Animal production in northern Australia: an introduction	35
References	40

Chapter 4

Feed improvement and management

Principles	41
Forage management objectives	41
Practical management options	41
Grazing pressure	42
Woody species and fire management	48
Sown species and fertiliser	50
Fertilisers and supplementation	54
Rumen modification	57
Cropping systems	57
References	58

Chapter 5

Animal improvement management and production

Principles	59
Animal improvement and management objectives	59
Generic management options	59
Beef production	60
Dairy production	70
Wool production	75
References	77

Chapter 6

Business management and economics

Scarcity and opportunity costs	79
Profit and management objectives	79
What is profit?	79
Enterprise and whole-property analysis	81
Response functions	83
Stocking rates	86
Discounting and cash flows	90
References	93

Chapter 7

Beef industry: constraints and opportunities

Major Australian farm industry constraints	95
Cattle growth rate	96
Improving growth rate	97
Reproduction	101
Death rates	102
Production volume, property size and costs	102
Product quality and costs	103
Drought	105
Conclusion	105
References	106

Chapter 8

Dairy industry: constraints and opportunities

Dairy industry situation statement	107
The future	108
References	112

Chapter 9

Wool industry: constraints and opportunities

Industry situation	113
Potential for diversification	113
Sustainability of the rangelands	114
Wool industry restructuring	114
Wool market demand	115

Appendices	117
